# LES ILOTS DE MAYOTTE

**Pléiades d'îlots**

Formant un chapelet de petits bouts de terre dans le lagon, des îlots d'origine volcanique ou sédimentaire constituent l'un des paysages typiques de Mayotte. Leurs intérêts multiples, culturels, paysagers ou naturels, ont poussé le Conservatoire du littoral à les protéger à l'exception de l'îlot Bouzi classé réserve naturelle nationale.

**Précieuse diversité**

Certains îlots accueillent une nature remarquable: forêt sèches, falaises rocheuses où niche le rare Paille en queue à brins blancs, plages de ponte de tortue, et récifs où vivent de nombreuses espèces de poissons et de coraux.

**Menaces**

Elles sont nombreuses et souvent d'origine humaine, comme le défrichement, la surfrequentation humaine (bivouac, pique-nique), les ancres de bateaux sur le corail... Toutes peuvent nuire à la beauté des îlots.

**Respecter les lieux**

Ce sont des milieux sensibles, il faut les préserver. Quelques règles de bonne conduite à suivre  
Tous les déchets produits seront protégés des rats et ramenés avec le promeneur. Des feux seront évités ou limités aux zones aménagées. Des oiseaux nichent sur les îlots une partie de l'année: éviter de s'approcher et de les déranger. Eviter le piétinement du platier à marée basse. Le mouillage des bateaux s'établit sur des zones dédiées en dehors des récifs coralliens.
